GRIFFENDO

Always On.
Always Secure.

Your Trusted Partner In Cyber Resilience

Griffendo is a next-generation Managed Security Services Provider (MSSP) dedicated to protecting enterprises against today's evolving cyber threats. With a 24×7 Security Operations Center, we deliver continuous monitoring, rapid detection, and swift response—ensuring businesses remain resilient, compliant, and secure.

The flagship telecom company has been providing NOC & Monitoring Security Services for several years to many global tier 1 telecos. Griffendo enables organizations to focus on growth while we manage the complexity of cybersecurity. Our model combines AI-driven analytics, 25 years of experience, and expert oversight to provide end-to-end protection—from proactive defense to rapid recovery.

Cybersecurity Can't Wait

Recent cyber incidents have exposed sensitive data across India, Asia, and the US—disrupting healthcare, halting manufacturing, and even infiltrating government networks. No sector is immune: from financial fraud to nation-state espionage, organizations face increasingly sophisticated attacks.

These include:

- Ransomware & Double-Extortion schemes
- Zero-Day Vulnerabilities and Supply Chain Compromises
- Insider Misuse and stolen credentials from phishing attacks

- Disruptive DDoS Campaigns
- Misconfigured Cloud Instances
- Nation-State Intelligence Operations

4.5M Average Breach Cost   40M+ Mega Breach Cost   60% Faster Response

Cost Factors
- System downtime
- Reputation damage
- Regulatory fines

Evolving Threats
- Ransomware as a Service
- AI-led attacks
- Supply-chain exploitation

Regulations
- GDPR, HIPAA, PCI-DSS, RBI - compliance is mandatory

Griffendo's Next Gen SOC

Proactive in nature: Anticipates and counteracts threats before they affect the organization.

Aggregated and faster response: Improves detection and remediation turn-around time using AI-based automated workflows.

Scalable & cloud-native architecture: Adjusts to enterprise growth and hybrid environments without issue.

24x7 monitoring: Provides ongoing, real-time protection and observa-bility throughout the ecosystem.

AI SOC: Autonomous risk reduction through advanced AI. Continuous threat analytics combined with autonomous decision-making will deliver faster, smarter prevention.

Next Gen Security Delivered 24x7

- ### SOC-as-a-Service
  Delivering round-the-clock monitoring, rapid detection, and incident response — enterprise-class cybersecurity at predictable costs.

- ### End-to-End Cybersecurity Partner
  Unified end-to-end cybersecurity partner delivering visibility, proactive defense, and resilience for secure, scalable digital growth.

- ### Threat Detection & Response
  Providing AI-driven analytics and behavioral monitoring to identify anomalies, correlate threats, and ensure swift containment.

- ### Vulnerability Management
  Ensuring continuous discovery, risk-based prioritization, and actionable remediation guidance to close gaps before attackers exploit them.

- ### Endpoint Security
  Applying advanced analytics and real-time monitoring across every device, neutralizing zero-day threats and insider risks.

- **Risk & Compliance Support**

  Offering automated compliance mapping, audit-ready reporting, and governance frameworks aligned to global and local regulations.

- **Cloud Security Monitoring**

  Safeguarding cloud workloads and applications through continuous visibility, threat correlation, and adaptive policy enforcement.

A Legacy Of Excellence

Griffendo is backed by the GV Kumar Group, an organization with over **25 years** of leadership in telecommunications technology operations. The Group has designed and managed large-scale Network Operations Centers (NOCs) for global and regional telecom operators ensuring round-the-clock availability, performance, and resilience of complex network infrastructures.

This NOC expertise built on decades of 24×7 monitoring, rapid incident management, and real-time analytics provides a strong foundation for Griffendo's Security Operations Center (SOC) model. Just as NOCs keep telecom networks running without disruption, Griffendo's SOC extends that same operational discipline into cybersecurity defense, safeguarding businesses from constantly evolving digital threats.

Why Choose Griffendo?

25 Years of Monitoring
Backed by a global legacy of technology and services expertise.

Always-On Protection
24×7 SOC operations with continuous monitoring and response.

Analytics at the Core
AI-powered machine learning and UEBA uncover hidden risks and insider threats.

Artificial Intelligence
AI-powered UEBA uncovers hidden risks, insider threats, and breaches.

One Unified Platform
Griffendo XDR unifies SIEM, MDR, and Data Lake seamlessly.

Fastest MTTD in the Industry
Griffendo cuts MTTD and MTTR up to 60%, minimizing risk.

With Griffendo, enterprises gain more than a service provider — they gain a trusted extension of their own security team. We'll help you strengthen your defenses, align with your goals, and protect what matters most to your business every single day.

Not Just Cybersecurity, It's Cyber Resilience.
